# Technical Data Sheet 

Caution: Research use only.

## AlphaLISA ${ }^{\circledR}$ SureFire $^{\circledR}$ Ultra $^{\text {TM }}$ <br> Akt1 Total Assay Kit

## Products: ALSU-TAKT1-B500, ALSU-TAKT1-B10K, ALSU-TAKT1-B50K, ALSU-TAKT1-B-HV

## Kit-Specificity Information

This assay kit contains antibodies which recognize two distinct epitopes on Akt 1. The protein detected by this kit corresponds to GenBank Accession NP_001014431. Also known as PKB, RAC, PRKBA, PKB-ALPHA, RAC-ALPHA. These antibodies recognize Akt 1 of human, mouse and rat origin. Other species should be tested on a case-by-case basis.

## Control Lysate Information

Positive Control Lysate: Prepared from HEK293 cells, cultured to confluence in T175 flasks in $10 \%$ FBS containing medium, then treated with $20 \%$ FBS for 15 min and lysed in 4mL of 1X SureFire Ultra Lysis buffer.

## Representative data

Data obtained with a 2-plate, 2-incubation protocol. Confluent MCF7 cells in a 96 well plate were serum starved for 4 hours, then treated with insulin at the indicated concentrations for 30 mins , and cells then lysed with 1 X Lysis buffer. Lysates were assayed for total or phospho Akt1 (Ser473) using respective SureFire Ultra assay kits.

Insulin Dose Response
AKT1 in MCF7 Cells
